Journalism is undergoing a fundamental transformation. Developments in technology, politics and society are increasingly putting the media industries and the profession of journalism at the centre of people's attempt to make sense of what is happening in the world around them.

The Erasmus Mundus Masters degree explores the practice and performance of journalism and the media in the context of a new environment brought about by globalization, modernization, commercialisation and professional developments.

The scheme offers a unique educational experience. You will study in three European countries. You will be able to specialize in one of three distinct areas of journalism: war and conflict, business and finance and citizenship. You will be part of a group of 40 students selected from a pool of candidates from around the world. You will be part of a network of classmates that draws on a variety of experience and knowledge and meet the global ambitions of the degree.

The Erasmus Mundus program in Journalism and Media seeks to produce alumni who will shape the future of global journalism.
